1. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The subject matter of the claims is allowable over prior art of record because all prior arts fail to teach or fairly suggest an information distribution system and method for providing content data and asset data comprising navigational information to at least one subscriber, providing a NULL packet inserter for inserting NULL transport packets within a transport stream including content packets, and a transport processor for **replacing at least some of the NULL packets with asset packets**, which comprise the navigational information for facilitating control and presentation of navigational menus for selecting content at a set-top terminal, the asset packets being associated with the content packets to produce a composite transport stream including the navigational information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
